

WirePoint

```
graph BT; InstancePoint --> WirePoint; IntermediatePoint --> WirePoint; PortPoint --> WirePoint;
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'WirePoint'. Below it are three boxes: 'InstancePoint' on the left, 'IntermediatePoint' in the center, and 'PortPoint' on the right. A horizontal line connects the three bottom boxes, with vertical lines extending upwards from each to a central point. From this central point, an arrow points directly up to the 'WirePoint' box, indicating that 'WirePoint' is the superclass for the other three classes.
