

Hurricane::DBo

```
classDiagram
    class HurricaneCell["Hurricane::Cell"]
    class HurricaneEntity["Hurricane::Entity"]
    class HurricaneDBo["Hurricane::DBo"]
    HurricaneCell --|> HurricaneEntity
    HurricaneEntity --|> HurricaneDBo
```

This diagram illustrates a class hierarchy for hurricanes. At the base is the Hurricane::Cell class, which is shaded gray. It inherits from the Hurricane::Entity class, shown above it. The Hurricane::Entity class, in turn, inherits from the Hurricane::DBo class at the top. All three classes are represented by rectangular boxes with black borders. The inheritance relationships are indicated by blue arrows pointing upwards from the child class to the parent class.

Hurricane::Entity
